

# THE FLICK

## NEW MASTERPIECE GLIDE & DEFINE LIQUID EYELINER

The most traditional of all the eyeliner looks, the Flick dates back to the Marilyn Monroe era of the 1950s. It's a very feminine look and suits most eye shapes.

The line starts delicately at the inner corner of each eye and thickens out over the lid. At the outer corner of the eye the line flicks out to a fine point. The small size of Glide & Define helps give you more control. And with the precision tip, you can vary the thickness of your line with ease.

Keep your mascara top-heavy for a sexier, flirtier edge.

### Application tip:

It's important that the eyeliner starts and finishes with a fine point. If you need more control, balance your elbow on a table to steady your hand.

Tip your head back and lift your brow to stretch the lids. This will help keep your line sharp and give you a clear indication of where to apply the liner.
