

# THE ROCK CHICK

## NEW MASTERPIECE GLIDE & DEFINE LIQUID EYELINER

This look comes straight off the catwalk and is popular with many models. Try it next time you're after sexy, smouldering eyes for the night.

Start with the Flick on the top eyelid – watch the vodcast to see how. Now for the lower lash line – take the liner right from the outer corner of the Flick and trace a line along the lower lashes. Usually this is quite tricky to do but the short handle on Glide & Define makes it easy.

Next, take a cotton bud and smudge the line to make it soft and smoky. Apply as much liner as you like until you have reached the perfect, smouldering finish.

The balance between the precise eyeliner on top and the unstructured line on the lower lashes makes this look urban and modern.

Apply mascara to the top and bottom lashes to give even more impact to the eyes.

### **Application tip:**

Make sure you smudge your cotton bud along the line before it dries. Once it's dry it will stay put all night long.
